

Figure 5.3: Measured 18-m temperatures in the Mont Blanc area from 1998 showing single values. \* denotes a value at 15 m depth (borehole 94-A) measured in 1994 (personal communication from C. Vincent, 1994); \*\* a value measured at 8 (borehole 3) and \*\*\* a value measured at 12 m depth (borehole 2) in 1998. Boreholes 9 and 99-B showed the same value of -12.15°C at 18 m depth (see Figure 3.3 for locations). Map: PM50 ©Swiss Federal Office of Topography.
